

Clean-corridor true-gap simple-profit review

154 consumed-design signals + 28 one-shot 2021 confirmation signals

Fixed before 2021 outcomes

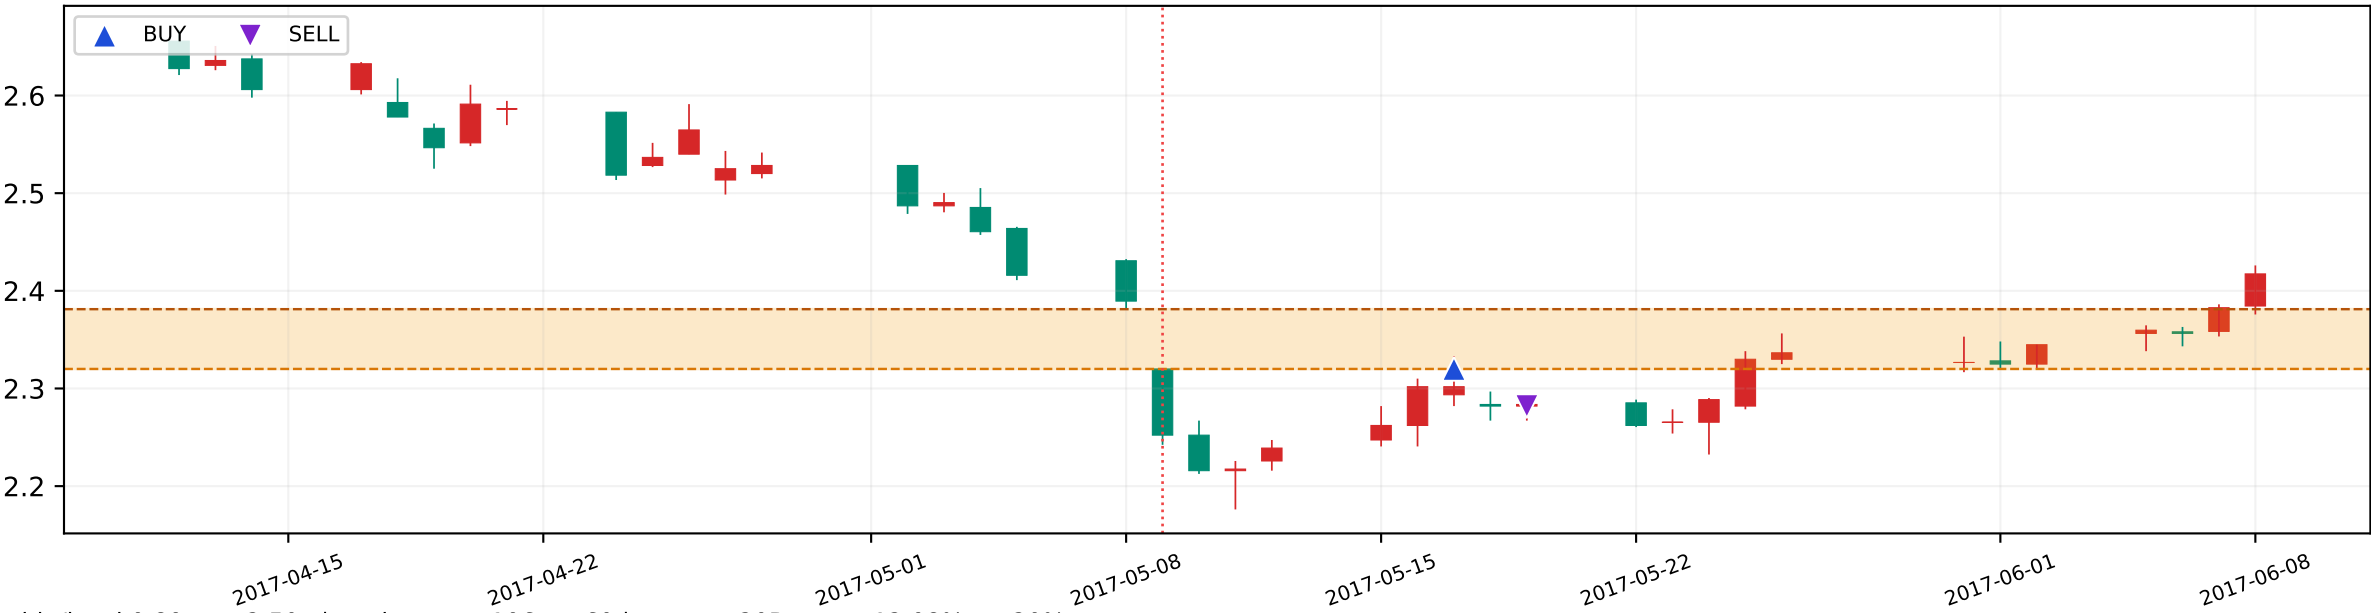

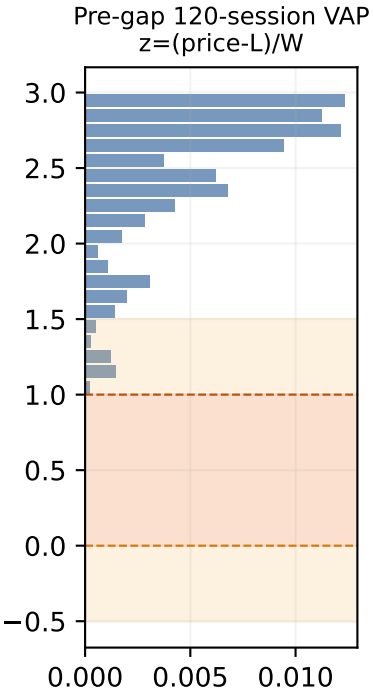

1. Broad low-inventory true gap with exact raw-fen first return
2. Maximum 0.10W corridor-bin density $\leq 2.5\times$ local average
3. Prior 120-session peak at least 60 sessions before gap
4. Pre-gap 20-session high-low range $\leq 20\%$
5. First close $\geq L$; next legal minute open with $\geq 1.5\%$ net U headroom
6. U target; X1 next-open failure; H10; T+1; 40 bp round trip
7. K2 per 50/50 Main/ChiNext sleeve; no leverage

2022 and later were not opened. Design pages are not new OOF evidence.
